MURALI KRISHNA GONGALI KURUVA

Business & Operations Data Professional → Turning Data into Actionable Insights → Driving Growth with Excel, Power BI, SQL, Python

France

Summary

Business & Operations-Focused Data Professional

I help organizations turn complex data → actionable insights → measurable business impact. With 3+ years of experience in analytics, predictive modeling, business intelligence, and process optimization, I focus on connecting data with strategy and operations.

Core Expertise

- Data Analysis & Modeling → SQL | Python | R | Excel (PivotTables, Power Query, Macros)
- Business Intelligence & Visualization → Power BI dashboards & KPI tracking for faster, data-driven decisions
- Machine Learning & Predictive Analytics → Forecasting, classification & trend detection using Python & scikit-learn
- Process Automation & Power Platform → Power Apps & Power Automate to reduce manual effort & improve efficiency

Impact Highlights

At Sodexo, Airbus & InsightMetrics Consulting, I:

- Delivered dashboards that accelerated decision-making by 30%
- Built predictive models improving forecasting accuracy by 20–25%
- Automated reporting processes to cut manual effort by 40%
- Translated complex data into insights that influenced executive-level strategy

Approach & Value

I operate at the intersection of analytics, operations & business strategy, leveraging data to inform strategy → optimize processes → unlock growth opportunities.

Open to full-time roles where I can drive operational excellence, actionable insights, and measurable impact.

Experience

Sodexo

Power BI & Power Platform Developer

March 2025 - September 2025 (7 months)

Paris, Île-de-France, France

- Developed interactive Power BI dashboards and data models to analyze operational and financial data, enabling stakeholders to track KPIs and make data-driven business decisions.
- Designed and implemented Power Platform solutions (Power Apps & Power Automate) to digitize workflows, automate manual processes, and improve operational efficiency across teams.
- Integrated Microsoft Fabric, SharePoint, and Microsoft 365 data sources to build scalable reporting pipelines and ensure centralized, reliable data access for analytics.
- Collaborated with cross-functional teams to translate business requirements into analytics solutions, delivering insights through advanced DAX, data modeling, and performance metrics.

Insight Metrics Consulting Private Limited

1 year 7 months

Data Analyst

September 2024 - March 2025 (7 months)

Bengaluru, Karnataka, India

- Conducted in-depth data analysis to identify trends, customer behaviors, and business opportunities, delivering actionable insights aligned with organizational objectives.
- Developed interactive Power BI dashboards and Excel-based reports to visualize complex datasets, enabling teams to track KPIs and make data-driven decisions.

- Applied SQL, Excel PivotTables, VLOOKUP, macros, and Power Query to manage and transform large datasets, detect patterns, and support forecasting initiatives.
- Collaborated with cross-functional teams to streamline workflows and implement data-driven strategies, enhancing operational efficiency and reporting accuracy across departments.

Business & Data Analyst Intern

September 2023 - August 2024 (1 year)

Bengaluru, Karnataka, India

- Conducted market research and competitive analysis to uncover trends, customer behavior, and business opportunities, supporting strategic decision-making.
- Built interactive dashboards and reports in Power BI, translating complex datasets into clear, actionable insights for business stakeholders.
- Applied basic machine learning techniques to identify patterns and generate predictive insights, aiding marketing and operational decisions.
- Leveraged advanced Excel functions (PivotTables, VLOOKUP, macros) and SQL to analyze large datasets, automate reporting, and improve overall business process efficiency.

Airbus

Machine Learning Engineer

January 2023 - September 2023 (9 months)

Bengaluru, Karnataka, India

- Developed and optimized machine learning models using Python and scikit-learn for predictive analytics, classification, and solving business and engineering challenges.
- Created interactive Power BI dashboards and visualizations to present key metrics, enabling stakeholders to make data-driven decisions and improve operational performance.
- Cleaned, transformed, and modeled large datasets in Power BI, delivering actionable insights that streamlined processes and supported business objectives.

➤ Collaborated with cross-functional teams to translate complex ML outputs into business insights, bridging technical analysis with strategic decision-making.

Education

EDC Paris Business School

Master's degree, Data Science & Business Analysis · (March 2025 - February 2026)

Sree Vidyanikethan Education Trust (SVET), Tirupati

Bachelor of Technology - BTech, Electronics and Instrumentation · (April 2020 - June 2024)
